Index to Volume LIII

Journal of Heredity, 1962

A

Algebraic Method Applied to Epistatic Problems, G. B. Mainland, 102.

Amazing Maize, J. A. Weir, 99.

Anderson, V. Elving, Human Genetics, (Rev.), 46.

Animal Care Panel Honors George D. Snell, 124.

Animal Genetics:

Bee, inhibition of yellow body color, 171.
Beetle, two loci controlling body color, 291.
Buffalo, color and horn variations, 239.
Cat, inheritance of catnip response, 54.
Cattle: nature of chance in breeding, 49; spastic lethal, 130; revised study of chromosomes, 157; malocculsion, 168.
Drosophila: reinvestigation of karyotype, 12; X-ray-induced exchanges occurring at four-strand stage in spermatocytes, 254.
Fowl: recessive "Lavender" ducks, 81; wingless, 109; polyembryony in unfertilized turkey eggs, 125.
Frogs: multiple genetically identical, 5; intraspecific nuclear transplantation, 199.
Hamster, sex bivalent of the golden, 227.
Horse, revised study of chromosomes, 157.
Lion, chromosomes, 162.
Marmot, pale mutation, 195.
Mice: studies on the hemoglobin loci, 73, 75, 77, 142, 147, 148; new viable yellow mutation, 84; chromosomes of the African, 95; serum esterases having different electrophoretic patterns among inbred strains, 111; spinner, 133; propylthiouracil taste inheritance, 183; new hairless mutation in deer, 192; tottering, a neuromuscular mutation and its linkage with oligosyndactylism, 233.
Pig, somatic chromosomes, 290.
Rabbit, developmental anomalies in inbred, 174.
Rat, repeatability of litter size and weight affected by selection and nutrition, 247.
Sheep: infantile entropion, 10; genetic history of Hampshire, 209.
Wasp, progeny production and sex ratio in irradiated parasitic, 271.

Anomalous Flowering in *Gossypium australe* F. Muell., Meta S. Brown, 139.

Another Clue to Mental Retardation, 256.

Another Reference to Mendel Before 1900, John R. Edwardson, 152.

Apples of Immortality from the Cuna Tree of Life, (Rev.), Eloise Street, 91.

Arthaud, V. H., *et al.*, Inheritance of a Spastic Lethal in Cattle, 130.

B

Bartlett, Alan C., *et al.*, Two Loci Controlling Body Color in Flower Beetles, 291.

Bee, see *Animal Genetics.*

Bell, A. E., *et al.*, Two loci Controlling Body Color in Flower Beetles, 291.

Benedict, L. I. and J. O. Ware, Colored Cottons and Their Economic Value, 57.

Berry, R. O. and B. L. Warwick, Infantile Entropion in Sheep, 10.

Bhowal, J. G. and Nirad K. Sen, A Male-Sterile Mutant Cowpea, 44.

Bianchi, Angelo and M. Contin, Mutagenic Activity of Isomeric Forms of Diepoxybutane in Maize, 277.

Biomathematics Symposium, 250.

Biomathematics Training at North Carolina State College, 141.

Blossom Sterility of Strawberry Seedlings in Relation to Other Characteristics, D. H. Scott, *et al.*, 187.

Breed Structure and Genetic History of Hampshire Sheep, Robert C. Carter, 209.

INFORMATION FOR CONTRIBUTORS

Membership in the American Genetic Association is not a prerequisite for publication in the *Journal of Heredity*. Papers will be judged by the Editorial Board on the basis of their original data, interpretation or review. Papers must be submitted solely to the *Journal of Heredity* and must not be reprinted or translated without the consent of the Editor. At least six months should be allowed for publication.

The following basic requirements must be met in submitting papers for consideration by the Editorial Board: (1) Papers submitted for publication must be neatly typewritten (using a new black ribbon) with wide margins and double-spaced throughout, including title, footnotes, explanations of figures and literature cited. It is requested that captions and legends for figures be typed on sheets separate from the text. Footnotes are not desirable and should be avoided wherever possible. Purely descriptive matter should be incorporated into the text, and literature citations should be treated as noted below. Titles should be condensed to fifty letters or less, with a short sub-head when necessary. (2) An original and one carbon copy are required. (3) Original illustrations and one photographic copy of the originals must accompany the typescript. (4) The editorial policies and style of the *Journal* should be followed as closely as possible and may be determined from any recent issue. Manuscripts will not be returned to the author.

Specific requirements follow:

STYLE—Follow the style used in recent issues of the *Journal* with respect to headings, citations of literature, legends of figures and tables. Acknowledgments must appear as a footnote to the title. Main headings in the text should be typewritten in capitals (with paragraph indentation). Subheadings should be lower case and underlined.

TABLES—It is required that each table be typed on a separate sheet, with a descriptive heading, numbered in roman numerals. Accuracy is essetial. Check witn special care all calculations and mathematical formulae. Statistical material must be approved by someone competent to judge. Any errors appearing in original tables necessitating the resetting of type will be charged to the author.

REFERENCES—Verify your citations. Check text references to literature citations and to illustrations. All figures should be cited. References to the literature should be cited by the author's name and literature cited reference number, e.g., (Smith and Jones[5]), or by the number alone where applicable. The bibliography should be arranged alphabetically by author under the heading, Literature Cited. Complete reference is necessary and the arrangement should be as follows: Smith, L. C. and G. B. Jones. Inherited shin-defect in cattle. *Jour. Hered.* 32:419-423. 1941.

LENGTH OF PAPERS—Papers are limited to four printed pages, including tables and illustrations. Before sending his manuscript to the Editor, the author should reduce excess material to the amount for which he is willing to pay, at the actual cost of $30.00 per excess page. Allowance must be made for space occupied by tables and illustrations.

ILLUSTRATIONS—Illustrations should be planned to fit the width of a column (2⅜ inches) or the full width of the type page (5 inches). Halftones and line drawings will be limited to one full page or equivalent thereof. Any additional expense incurred for engraving will be charged to the author at cost. Drawings must be submitted in a form suitable for cuts. Original photographs should be submitted unmounted and unlettered in the form of clear black and white prints on glossy paper, and should be identified on the back of each figure. Care should be taken to see that they cannot be bent or folded in handling, and paper clips should not be used. All imperfections in the original copy are reproduced.

PROOFS AND REPRINTS—Authors will receive galley proofs. The corrected proof and reprint order should be returned to the Editor *within four days* after receipt. Alteration in proof necessitated by an author's changes from his manuscript will be charged to the author. Page proof will be sent when time permits. Reprints will be furnished at cost. A price schedule for reprints will be sent with galley proof.

All manuscripts and correspondence should be addressed to the Managing Editor, *Journal of Heredity*, 1507 M Street, N. W., Washington 5, D. C.
